**Can be installed in
any room in your home**

- **9.5mm:** Residential, Heavy Commercial, and Garage.
- **5mm:** Residential and Light Commercial.

**Waterproof when
installed correctly**

No acclimation needed

Stain Resistant

Scratch Resistant

Easy To Clean

FloorScore® by SCS Certified

Tested for 35 individual Volatile Organic Compounds (VOCs) specified in CA Section 01350, for air quality ensuring that your home is safe. FloorScore® is the most recognized indoor air quality (IAQ) certification standard for hard surface flooring materials, adhesives, and underlayments.

What is the benefit to being FloorScore® Certified?

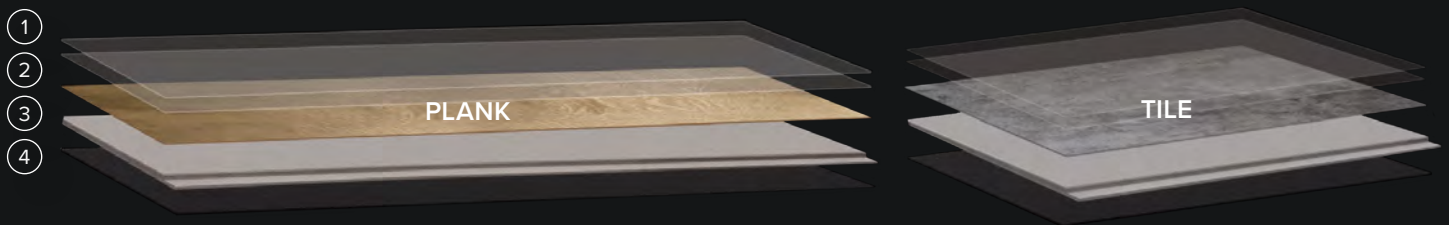

Indoor air quality is important because, if you’re like most people, you spend around 90% of your time indoors. If you’re breathing poor quality air, you could be facing a higher risk level for a variety of health problems, including headaches, dizziness, and more serious long-term conditions. The FloorScore® certification means healthier, cleaner air. And that means healthier humans and pets.

Healthy flooring choice for:

- Garages
- Offices
- Commercial
- Kitchens
- Bathrooms
- Living Room
- Laundry Room
- Bed Rooms
- Basements
- Trailers & RV’s

Our floors are built better

Our multi-layer floors are engineered to deliver the ultimate combination of durability and beauty.

1. Commercial-grade wear layer

dual-layer protection against scratches and stains

- **9.5mm:** 0.7 mm wear layer
- **5mm:** 0.5 mm wear layer

2. High-definition photographic layer

with advanced EIR wood or stone texture, for realism you can feel

- Same thickness across both 9.5mm and 5mm options

3. Stone composite core layer

waterproof when correctly installed, minimizing expansion and contraction

- **9.5mm:** 7.3 mm core layer
- **5mm:** 3.5 mm core layer

4. Anti-mold IXPE foam layer

cross-linked foam underlayment for an insulating water resistant barrier

- **9.5mm:** 1.5 mm foam layer
- **5mm:** 1 mm foam layer

Flooring Sample Kit

Individual Samples

Received your samples, what's next?

Sometimes, having multiple great options can be a bit confusing. Here are a few tips to guide you to making a decision.

See things in a different light

Put samples up against furniture, walls and flooring to see how they match. Try them out in different rooms to see how they look in varying light conditions.

Fresh eyes, fresh opinion

It's often helpful to step away and enter a room again, as if seeing the sample for the first time. Friends and neighbors are also a great way to get a second opinion. Or third.

Crunch the numbers

Once you've landed on your choices, it's important to calculate how much product you'll need. Our designers can help as part of your free consultation, to make sure you order the perfect amount to fit your space and your budget.

Make your plans a reality

Now comes the fun part. Connect with one of our award-winning NewAge design experts. Book your free appointment on our Design Services Page anytime.

Why buy from NewAge Products

NewAge Products are designed and crafted only with premium quality materials. Our modular designs are your assurance that components fit together seamlessly, and we offer expert assistance and support every step of the way.

Large item delivery made easy

An easier delivery process gets your home improvement project off to a great start. Choose from our standard curbside delivery, or upgrade to our premium White Glove delivery for a simplified, worry-free experience.

Great results start with smart planning

You can visualize your next room renovation but have you really thought about everything that will go into it? With a little imagination, and a lot of thinking, you can create a room that’s easy to love. And easier to live in. Once you realize what your needs are, you’ll be able to think of creative ways to satisfy them.

STEP 1	STEP 2	STEP 3
Pre-Planning • Plan the transformation of your space. • Use our Flooring Measurement Guide to create a sketch of your current space. • Browse our product lineup and make preliminary product selections. • Formulate a budget and explore financing options (Affirm Financing).	Schedule An Appointment Take advantage of our free expert design services! Visit our site newageproducts.com/virtual-design-consultation OR Call 1-877-306-8930 to schedule your personal phone or interactive video design consultation.	Let’s Design Together • Share your ideas and brainstorm with one of our design experts for FREE. • Review preliminary drawings. • Discuss any appliances involved, like fridges, stoves, microwaves, etc. • Preview 3D design renders and finalize your product selections.
STEP 4	STEP 5	STEP 6
Finalize Your Plans • Review and approve your final design and measurements with the NewAge design expert. • Submit your product order. • Finalize payment arrangements. • Create tentative project schedule.	Get Your Space Ready • Dedicate sufficient space to store products before and during your reno. • Inspect items as they arrive and note any issues. • Clear the area to be renovated. • Confirm start date with your installer.	Delivery Services • Choose standard curbside delivery or upgrade and enjoy the worry-free experience of our White Glove Delivery. • White Glove includes removal of all boxes, packaging material and wood pallets, leaving your space clean and ready to enjoy.

Need the renovation done by a certain time?

Depending on the size and scope of your remodel, it could take weeks or months to ship and complete. **Plan in advance** for this as you decide when to start your project.

Home, Office, or Business?

We’re your one-stop shop for all the cabinets, flooring, accessories and design inspiration you need to start a new business or to take your current one to a higher level. And our cabinetry arrives pre-assembled for fast, easy installation!

Choose Materials with Sample Swatches

See colors and feel the quality of our materials, finishes and textures to make decisions easier for you and your clients.

6-Month Design Hold

Plans and pricing are locked in for 6 months, giving you time to finalize those hard-to-close projects.

Take-Off Services

Accurate and easy to understand so you can quote quickly with confidence.

Accurate Engineering Drawings

The measurements and product specs you need for a detailed floor plan.

On time and under budget

FLEXIBLE DELIVERY

From curbside to white glove delivery, we’ve got options to fit your needs.

TIERED PRICING

The more you order, the more you save. Money in your pocket.

FREE DESIGN WORK

Our in-house designers help you create the perfect plan for your clients’ space.

Fresh upgrade for any room

Our flooring can be installed in any room of your home.

- ① **Above Grade**
Refers to any portion of the home that is above ground level, such as the upstairs or attic.
- ② **On Grade**
Refers to the main floor of the home that sits on ground level, such as living rooms or garages.
- ③ **Below Grade**
Refers to any level of the home that sits below the earth's surface, such as the basement.

Installation Method

For most types of flooring, there are multiple installation methods to use, such as Floating, Nail Down and Glue Down installation. Our floating flooring installation process is much simpler. All that is required is a simple **Click-Lock installation**, which doesn't require any adhesive at all. This makes Click-Lock one of the easiest installation methods and great for "DIYers".

NewAge Installation Services

Measurement Guide

Determining how much flooring you need to buy is relatively simple, but it pays to measure properly. Follow these steps below to accurately calculate how much flooring you need for your project.

STEP 1: Get a Rough Estimate

Not all rooms are perfectly square or rectangular, so it's best to start with the largest measurements and work backwards — subtracting from the total area that does not require flooring. To get a rough estimate as your starting point, you will calculate the **gross square footage of a room**. Begin with the longest measurement from wall to wall, in both directions (length and width of the room). You will subtract for permanent objects and irregularities in the shape of the room in Step 2.

Multiply Length by Width to get the gross area:

- Make a list of all the rooms that you will be buying the same flooring for, and calculate each one individually.
- Measure the longest width from one wall to another, then round up to the nearest foot.
- Measure the longest length between the other two walls, then round up to the nearest foot.
- Multiply the two numbers to get the rough estimate.
- Example: Width 20 ft; Length 10 ft; $20 \times 10 = 200$ sq. ft.

STEP 2: Subtract the Area of Permanent Objects

To get an accurate estimate for the amount of flooring you will need, you should subtract the floor space of permanent objects where flooring will not be installed — for example, kitchen islands or staircases.

- Find the square footage of the object (width x length).
- Take the total area of unusable floor place and subtract that from the rough estimate you calculated in Step 1.
- Example: (Gross Area of the Room) 200 sq. ft. minus (Area of the Kitchen Island) 20 sq. ft. = 180 sq. ft.

STEP 3: Add the Measurements for All Rooms in the Project

Complete Step 1 and Step 2 for each room you will be installing the same type of flooring in, then add the total areas of the rooms.

- Example: (Room 1) 180 sq. ft. + (Room 2) 110 sq. ft. + (Room 3) 110 sq. ft. = 400 sq. ft. total flooring needed.

STEP 4: Factor in Waste for Your Flooring Project

Virtually every flooring project requires cuts so that the flooring can fit exactly within the space. The general rule of thumb is to **add ten percent** to the total amount needed to account for waste. This buffer takes into consideration small pieces left over after making cuts, measurement or cutting errors, and planks or tiles that get damaged during the project.

- Example: $400 \text{ sq. ft.} \times 0.10 = 40 + 400 = 440$ sq. ft. needed

Compare Chart

View our chart below to review the key differences between the two flooring types and thicknesses.

PHYSICAL PROPERTIES (LUXURY VINYL PLANKS AND TILES)			
Specification	Stone Composite LVP Flooring 9.5 mm	Stone Composite LVT Flooring 9.5 mm	Stone Composite LVP Flooring 5 mm

Product Testing and Results

Rigorous product testing is an important part of our engineering process.

STANDARDS - SAFETY AND PERFORMANCE (LUXURY VINYL PLANKS AND TILES)				
Test Description	Test Specification and Standard	NewAge Passing Requirements	9.5 mm Flooring	5 mm Flooring
Cleanability and Stain Resistance	NALFA LF 01-2011 Section 3.4 (modified with additional chemicals)	List of chemicals (on page 28) are applied to flooring. It is rated depending on cleaning method required to remove chemical. No more than slight effect is allowed.	Passed test	Passed test
Big Ball Impact Test	NALFA LF 01-2011 Section 3.5	Polished steel ball weighing 224 g, measuring 38.1 mm in diameter dropped onto flooring and no Crack observed	Passed test with Heavy commercial rating	Passed test with Light commercial rating
Small Ball Impact Test	NALFA LF 01-2011 Section 3.6	Impact dart weighing 25.0 g. It shall consist of a steel or brass dart tipped with a 5 mm (0.197 in) diameter steel ball dropped onto flooring and no Crack observed	Passed test with Heavy commercial rating	Passed test with Light commercial rating
Wear Resistance	NALFA LF 01-2011 Section 3.7	Using 180 grit aluminum oxide sand paper, it is rubbed on the flooring until wear layer is breached. Fresh sandpaper to be replaced every 200 cycles.	Passed test with Heavy commercial rating	Passed test with Light commercial rating
Castor and Chair Scratch Resistance	NALFA LF 01-2011 Section 3.9	Caster wheels are applied to the flooring and cycled. No visible damaged to be observed after 25,000 cycles	Passed test	Passed test
Residual Indentation and Surface Integrity	ASTM F1914	Steel cylindrical foot is used to attempt to indent and puncture the flooring wear layer. Average of indents greater than 0.18mm or puncture through wear layer is not allowed	Passed test	Passed test
Dimensional Stability to Heat	ISO 23999 / ASTM F2199	Flooring is measured before and after conditioning at 70C for 6 hrs. Must meet dimension and curling acceptance criteria	Passed test	Passed test
Dimensional Stability to Cold	NewAge Internal Protocol	Flooring is measured before and after conditioning at -20C for 6 hrs. Must meet dimension and curling acceptance criteria	Passed test	N/A for indoor usage

STANDARDS - SAFETY AND PERFORMANCE (LUXURY VINYL TILES AND PLANKS)				
Test Description	Test Specification and Standard	NewAge Passing Requirements	9.5 mm Flooring	5 mm Flooring
Resistance to Chemicals	ASTM F925	List of chemicals (on page 28) are applied to flooring. It is rated depending on cleaning method required to remove chemical. No more than slight effect is allowed.	Passed test	Passed test
Heat Resistant	ASTM F1514	Color change observed under spectrophotometer must meet (avg, max) deltaE* < 8 after 7 days under 70C	Passed test	Passed test
Light Resistant	ASTM F1515	Color change observed under spectrophotometer must meet (avg, max) deltaE* < 8 after 300 h under Xenon-arc lamp light source	Passed test	Passed test
Indoor Air Quality	Floorscore Certification	Meets CA01350 air quality standard	Passed test	Passed test
7 Phthalate	CPSC-CH-C1001-09.3	CPSIA	Passed test	Passed test
Heavy Metals	US EPA 3050B/3051	California Prop 65	Passed test	Passed test
Coefficient of Friction	ASTM C1028-07e1	Static coefficient of friction >0.6 under wet condition	Passed test	Passed test
Critical Radiant Flux	ASTM E648	Measures the level of incident radiant heat energy on a floor covering system at the most distant flame-out point. Measurement must be >= 0.45 W/cm2	Passed test	Passed test
Sound (STC)	ASTM E90 / ASTM E413	Measures the Sound Transmission Class (STC) on how well the flooring attenuates airborne sound. STC must be >50	Passed test	Passed test
Sound (IIC)	ASTM E492 / E989 / E2179	Measures the Impact Insulation Class (IIC) on how well the flooring soundproofs impact noise. IIC must be >50	Passed test	Passed test
Concentrated Load	NewAge Internal Protocol	Press 3 inch round disc until failure in Flooring core material. Must be greater than 40,000 lbs	Passed test	N/A for indoor usage

STANDARDS - SAFETY AND PERFORMANCE (LUXURY VINYL TILES AND PLANKS)				
Test Description	Test Specification and Standard	NewAge Passing Requirements	9.5 mm Flooring	5 mm Flooring
Fungal Resistance	ASTM G21	Observe growth of test organisms. Observations are recorded after 28 days at 85% RH, 28C. No growth is to be observed	Passed test	Passed test
Moisture Absorption	ISO 62:2008 Method 1 (for 24h immersion period)	Dry in oven at 50C for 24h then immerse in water at 23C for 24h. % Water absoption must be <0.1%.	Passed test	Passed test
Water Leakage Testing	NewAge Internal Protocol	Water is pooled on the seam of assembled flooring for 24 hrs. No liquid is to penetrate through the seam.	Passed test	Passed test

The best features of every flooring material, combined.

We’ve developed a commercial-quality flooring with the natural beauty of wood or stone, that’s durable enough for use in any interior space, even the garage. Each material layer is engineered for the perfect balance of resilience, style, and convenience.
